EDUCATION

LESYA UKRAINKA VOLYN NATIONAL UNIVERSITY

Bachelor's Degree in Computer
Science & Information
Technology

GPA: 4.87/5.0 (Diploma with
Distinction)

LICENSES & CERTIFICATIONS

- **GCI World — University of Tokyo**
- **HarvardX — Data Science:**
Machine Learning
- **IBM — Generative AI**
- **Data Engineering Summer
School**
- Linux Foundation — **Git**

CORE SKILLS

Writing: UX Writing, Product Copy,
Microcopy, Content Writing, Technical
Documentation, Editing, Analytical Writing,
Tone of Voice, System Prompt Design,
Conversational Writing.

SEO & Analytics: On-Page SEO, Screaming
Frog, Google Search Console, Schema.org,
JSON-LD, Open Graph, sitemap.xml,
robots.txt, Google Analytics 4, Consent
Mode v2, GDPR.

Development: Python, Flask, SQL/MySQL,
HTML/CSS, JavaScript, Bootstrap, JWT Auth,
REST APIs, Git, C++, Canva, Figma, IC, Excel.

AI & Data: NLP, Google Gemini API, Emotion
Recognition, Multimodal & Generative AI,
Prompt Engineering, Claude, Data Analysis,
Pandas, NumPy, Machine Learning, Time
Series Analysis.

LANGUAGES

- **Ukrainian:** Native
- **English:** B1-B2
- **Polish:** B1
- **Kor, Jpn, Chi:** A1-A2

PROFESSIONAL SUMMARY

Computer Science graduate with Honors (GPA 4.87/5.0) with hands-on experience building AI-powered web applications using Python, Flask, REST APIs, databases, and LLM APIs. Creator of Safe Place, a multimodal emotion-aware AI web application combining text and voice analysis with Gemini API integration. Experienced in AI application design, conversational flows, system prompts, technical documentation, and UX microcopy. Published 4 research papers and won 1st place in a university research competition. Completed an intensive Data Science & Machine Learning program at GCI World – University of Tokyo (Matsuo-Iwasawa Lab).

EXPERIENCE & PROJECTS

■ AI PRODUCT WRITER & DEVELOPER — Safe Place MAY 2025 – PRESENT

Emotion-aware AI web application

- Architected full-stack app: Flask backend, Google Gemini API, 18 REST endpoints, JWT auth + bcrypt hashing.
- Implemented multimodal emotion recognition: text sentiment + voice tone with paralinguistic features.
- Developed interpretable rule-based fusion algorithm with adaptive weighting – O(1).
- Wrote every UI string, the complete system prompt (empathy, CBT principles, crisis protocols), 10 self-help techniques, 4 blog articles, and the crisis support page.

Result: functional end-to-end prototype. Multimodal approach improved emotion classification accuracy by 17% vs text-only analysis. 4 critical cases detected (9.1%) with zero false positives. 2 published papers, 1st place research award.

■ Technical Writer & Developer — Manufacturing Company Feb 2026 – Jun 2026

- Developed a 3D warehouse visualization system integrated with 1C and Excel for inventory management.
- Created technical documentation and user guides for non-technical employees.
- Translated technical workflows into clear, practical instructions.

Result: tool adopted for daily inventory management, replacing paper-based records.

■ UX WRITER & DEVELOPER — KORstudy Oct 2024 – Present

Ukrainian Korean-learning platform easy-korean-learning.netlify.app

- Built 10+ pages end-to-end: UX copy in Ukrainian, frontend (Bootstrap 5.3, Vanilla JS), technical SEO.
- Ran Screaming Frog audit: fixed broken links, duplicate titles, canonical issues.
- Implemented JSON-LD, Open Graph, sitemap.xml, robots.txt; verified in Google Search Console.
- Integrated GA4 + Consent Mode v2 + CookieYes (GDPR).

Result: 0 SEO errors after audit. Live platform.
