EDUCATION

LESYA UKRAINKA VOLYN NATIONAL UNIVERSITY

Bachelor's Degree in Computer
Science & Information
Technology
GPA: 4.87/5.0

CERTIFICATIONS & TRAINING

- **HarvardX:** Data Science: Machine Learning
- **IBM:** Introduction to Generative AI
- **Data Engineering and Security Summer School** – Ivan Franko National University of Lviv (120 hrs)
- **GlobalLogic Education:** IT Choice Course
- **Oracle Academy** – Database Programming
- **GoIT, Campster, AIT 2023** – Various programming bootcamps and summer schools

SOFT SKILLS

- Analytical & problem-solving
- Team collaboration and communication
- Attention to detail and organization
- Adaptability and self-directed learning
- Experience with project ownership and presenting to experts

PROFESSIONAL SUMMARY

Computer Science graduate (GPA 4.87/5) with a strong foundation in software development, data analysis, and AI. Built and deployed a working web application with generative AI, designed a financial analytics system, and completed coursework in machine learning, data engineering, and cybersecurity. Passionate about building impactful technology and solving real-world problems. Quick learner, detail-oriented, and fluent in Ukrainian and English (B1+), with active studies in Polish, Chinese, Korean, and German. Active participant in academic conferences and author of peer-reviewed publications. Actively looking for a hands-on opportunity to grow as a software engineer through open-source collaboration.

PROJECTS

Safe Place – Emotional Support Web Application

2025–2026

Generative AI, Python, Web Development

- Designed and developed a full web application that analyzes users' emotional state through text messages.
- Built an analytics dashboard with trend visualizations and statistical summaries of emotional patterns.
- Implemented crisis detection logic to flag messages indicating stress, anxiety, or depression.
- Result: A fully functional prototype solving a real-world need, demonstrating end-to-end system design, data handling, and AI integration.

Bank Budget Planning & System Analysis

2025

Data Analysis, Excel, Optimization

- Developed a bank budget for 2026, covering income, expenses, inventory, and supply chain.
- Applied optimization methods to calculate resource efficiency and allocate funds strategically.
- Result: Document approved with distinction; presented to invited industry experts.

KORstudy – Korean Language Learning Platform

2024

HTML, CSS, JavaScript, PHP

- Built an educational website with structured courses, pricing plans, and user interaction features.
- Result: Live student project demonstrating front-end design and basic back-end integration

ToDo List Web App

2023

HTML, CSS, JavaScript, Local Storage

- Developed a task management tool with persistent local storage for user data and task tracking.

HARD SKILLS

- **Languages:** Python, JavaScript, HTML/CSS, PHP, C++, R, SQL, Scala, Prolog
- **Tools & Platforms:** Git, GitHub, VS Code, Figma, Oracle Database, Wireshark, Cisco Packet Tracer, Open Server
- **Data & Analytics:** Data visualization, statistical analysis (R), budget modeling, system optimization, Excel, Google Sheets
- **Design & Prototyping:** Figma, Canva, UX/UI fundamentals

LANGUAGES

- **Ukrainian:** C2
- **English:** B1
- **Polish:** B1
- **Chinese, Korean, German, Japanese:** A1–A2
